Figure 1 illustrates the mapping of a map to a map symbol. The top part shows a map with various features: a Highway (solid line), a Secondary Road (dashed line), a Junction/Interchange/Entry (Y-shape), a Railroad (line with cross-ticks), a River/Lake (wavy line), and a Glacier (dashed wavy line). The bottom part shows a map symbol with a rectangular box labeled 'Inset' and a rounded rectangular box labeled 'Out Area'. The 'Inset' box contains a simplified version of the map features, with the 'River/Lake' and 'Glacier' features represented by blue and white patterns respectively.

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

¹ A '*' following a place name indicates that the place is coextensive with a MCD; a 'MCD' indicates that the place is also a false MCD; the false MCD name is not shown.

² A '*' following a block number indicates that the block number is repeated elsewhere in the block.
